## NEVER SIT STILL FOR CONVENTION.

A chair should only be as stationary as the mind of its occupant. And its design should make the occupant comfortable without yielding to complacency. Made mobile to keep pace with today's business environment from quality materials that will last, Mesa Motio chairs bring a more accommodating design to the table, the desk, or wherever your next inspiration is going to strike.

### MOTIO CHAIR SERIES

Inspired by the Latin word for movement, the Mesa Motio line increases your options in virtually any space by uniting ergonomic comfort and mobile functionality. Great ideas are driven by people who refuse to stand still.

### MOTIOMESH

In any work environment, the keys to getting things done are comfort and control. The Motio Mesh Chair features a series of control mechanisms, allowing you to customize the fit of the chair to your body type and posture. The lumbar support is height-adjustable to align with curve of your back. The back easily reclines using a synchro control, allowing the seat pan position to tilt and move with you. For every two degrees of recline, there is one degree of seat tilt, and it can also lock in the upright position. Arms can be customized for width and height and the chair itself can be precisely raised and lowered. And because no one ever succeeded in business by standing still, the Motio Mesh Chair provides mobility to help you keep pace with the world. Color: Black.

### MOTIOGUEST

Whether they're in your office for a review or a meeting, you want your guests to be comfortable. The Motio Guest chair is the perfect companion to the Motio Mesh and has been engineered to provide just the right amount of flex and comfort. The lumbar support is designed to align with curve of your back. The fixed base and armrests provide a solid platform and support for even the longest committee meetings. Color: Black.
